

The Director

25X1 Attached FYI is the cable George Allen mentioned in the car this morning. I have discussed it with [] but not yet with Colby. In a low-key (but I hope not too low) I suggested that in the future, cables containing what amounts to a major policy recommendation be sent through here before they go out. I certainly do not want to poach on FE's preserves, but your flank has to be protected.

George A. Carver, Jr.
